

HDL Cholesterol Subfractions

Sample matrix (Volume needed):

Fasting Serum (50 - 100 uL)

Price per sample (VAT incl):

R 900 (Client should provide total cholesterol value)

Analytical Technique:

Lipoprint - Gel Electrophoresis

Compound list

Separates and quantifies up to 10 HDL subfractions, classified from large buoyant HDL lipoproteins (HDL-L) to small-dense HDL lipoproteins (HDL-S).
